EDUCATION

Western University & Ivey Business School

GPA: 3.9/4.0

Software Engineering (BESc) and Honours Business Administration (HBA)

Graduated June 2026

- **Coursework:** Data Structures & Algorithms, Cloud Computing, Machine Learning, Operating Systems, Databases, Web Development, Object-Oriented Programming, Software Testing, Computer Networks, Cybersecurity, Data Analytics
- **Awards:** \$32,000 in merit-based scholarships; 1st Place, AWS Hackathon (2025); 1st Place, BBL ML Hackathon (2024)

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, C++, C#, HTML/CSS

Frameworks: React, Next.js, Angular, Node.js/Express, Spring Boot, Flask

AI/ML & Data: Snowflake, Scikit-learn, Pandas, TensorFlow, Azure AI, Google Gemini, HuggingFace, RAG & embeddings

Cloud & DevOps: AWS (Lambda, S3, Bedrock, Cognito, EC2, API Gateway), Docker, Kubernetes, Git, CI/CD, Linux, Bash

Databases: PostgreSQL, MySQL, MongoDB, YugabyteDB, SQLite

Certifications: AWS Certified Cloud Practitioner, Cloud Computing: Core Concepts, The Complete SQL Bootcamp

EXPERIENCE

Amazon Web Services

Toronto, ON, Canada

Solutions Architect Intern | Next.js, React, TypeScript, Java, Spring Boot, AWS

May 2025 – Aug. 2025

- Cut exploratory data analysis from **4 hours to under 2 minutes** by building a full-stack platform (Next.js/React, Spring Boot/Java) where **Amazon Bedrock AI agents** auto-generate data visualizations and insights from **10GB+** raw datasets
- Architected secure, multi-tenant cloud infrastructure across **8+ AWS services** (Cognito JWT/RBAC, S3, Lambda, API Gateway) with EC2 Auto Scaling and load balancing, achieving **99.9% availability** at **sub-2s** latency
- Developed a code-generation feature that writes Python/R data analysis scripts, **cutting manual coding time by 80%**
- Created an outbound messaging platform (React, Flask, AWS Amplify) that automated personalized communications across **150+ customer accounts**, **cutting manual prep time 85%** and driving adoption by the AWS Cloud Sales Center

Bond Brand Loyalty

Toronto, ON, Canada

Software Engineering Intern | Python, Azure, Snowflake, Streamlit, Scikit-learn

May 2024 – Aug. 2024

- Built a **RAG-powered** brainstorming tool in Streamlit for **50+ marketers**, generating copy and concept artwork via GPT-4o and DALL-E and retrieving similar campaigns from a **75K+ ad dataset** using Azure OpenAI embeddings
- Engineered a Python **ETL pipeline** for a **\$25B grocery client**, scraping competitor flyers with BeautifulSoup and classifying loyalty offers via Azure AI Vision and GPT-4o into Snowflake, **cutting manual labour hours by 11%**
- Shipped a Snowflake Application (Snowpark, Scikit-learn, Streamlit) to production for **250+ employees**, automating key machine learning tasks, such as model selection, feature-importance analysis, and cross-nested validation for bias-free tuning

Elim Solutions

Markham, ON, Canada

Software Developer Intern | Angular, Node.js, Express, MongoDB, TypeScript, AWS, Git

May 2023 – Aug. 2023

- Built a full-stack employee-feedback platform with **micro-frontend architecture** (Angular, Node.js, MongoDB), featuring a REST API and encrypted, anonymized data storage, now adopted across a **30-person workforce**
- Resolved **50+ Jira tickets** across two Oracle NetSuite e-commerce platforms in an Agile team, building responsive UI components and custom **SuiteScript** and Handlebars backend helpers via **Git-based CI/CD** pipelines

The Buckmaster Institute

Vancouver, BC, Canada

Software Developer Intern | Python, OpenCV, Scikit-learn, Pandas, NumPy

May 2022 – Aug. 2022

- Engineered a custom computer-vision pipeline (OpenCV, Scikit-learn) for musical-score recognition, boosting notehead detection accuracy to **95%** across **50+ scores** via threshold and dual-template optimization
- Built a Python validation framework benchmarking **25K+** detected coordinates against ground truth to flag false positives, exporting clean CSV datasets and error-visualization charts for downstream machine learning research

LEADERSHIP & PROJECTS

Ivey Technology Club

London, ON, Canada

Co-President

Sep. 2023 – Apr. 2025

- Directed the largest technology club at Ivey, managing a **\$30K budget** and a team of **18 executives** to deliver firm trips, workshops, and conferences for **250+ members**, securing partnerships with Salesforce, Microsoft, NVIDIA, and Ramp

News 4 U — Software Engineering Capstone 🏆 | React, PostgreSQL, Google Gemini, HuggingFace, Google Cloud, Git

- Built and deployed a full-stack AI news platform (React, Node.js/Express) with a 4-person Agile team, featuring personalized feeds, a RESTful API with **8 route groups**, JWT auth middleware, and **PostgreSQL + pgvector** semantic search
- Integrated an AI pipeline using Google Gemini for adaptive article rewriting and vector embeddings, with HuggingFace Qwen for zero-shot readability classification to generate personalized learning roadmaps

Promotion Body of Work Generator — AWS Hackathon (1st Place Overall) 🏆 | React, Flask, Atlas Core Agents

- Cut promotion-documentation time **from weeks to under 5 minutes** using Atlas Core Agents to aggregate employee data, metrics, and achievements across **3 enterprise systems** (Quip, Salesforce, Marshal), earning department-wide adoption
